CITY EMPLOYEES AS VOLUNTEER FIREMEN:

Any City employee who elects to become a member of the Coral Springs Volunteer Fire Department and who qualifies to be a Volunteer Fireman will be allowed to be released from the employee's normal employment, at times when the City's Fire Administrator requests an employee (or employees) to be released from duty for the purpose of fighting fires in the City of Coral Springs.

It is clearly understood when City employees are performing duties as Volunteer Firefighters that they are functioning primarily in the job for which they were employed by the City and assisting the Volunteer Fire Department is a secondary responsibility; and, as such, they are eligible for the protection offered by City Insurance and Workmen's Compensation benefits.

HISTORICAL INFORMATION:

The Policy contained above is the same Policy adopted by former City Manager, Phillip R. Kelley, on March 24, 1978. This Policy is hereby recodified in a new format without change.
