

Residential Pre-Approved Roof Colors 2020

Coral Springs Roof Brochure

<https://www.coral springs.org/home/showdocument?id=10464>

To assist Coral Springs homeowners and roofing contractors, the City has prepared a list of clay and cement roofing tiles that comply with the design guidelines of the City. These colors and styles are pre-approved for single-family homes. The roofs of multi-family apartment or condominiums and all commercial buildings must be reviewed for coordination with the overall building design.

The list is not comprehensive of all products available. Other tiles may comply with the guidelines. New tile colors and styles should be submitted to the City for review prior to submitting for the roofing permit. In general, roof tiles with dark antiquing (black or dark stripes), dark colors, and contrasting roof blends are not allowed.

If a homeowner wishes to use a roof color or style that does not comply with the guidelines, the homeowner may ask for review by the Architectural Review Committee (ARC). The ARC meets the second Wednesday of each month and the deadline to submit a request is the last Friday of the previous month.

NOTE: () Requires ARC Approval**
